

# How to Embed a Classroom on a Website

Welcome to our guide on embedding a ProProfs Classroom on your website using [ProProfs Quiz Maker](#). In this tutorial, we'll show you how to effortlessly add a classroom to your site, allowing learners to take quizzes directly on your page. Follow along for step-by-step instructions.

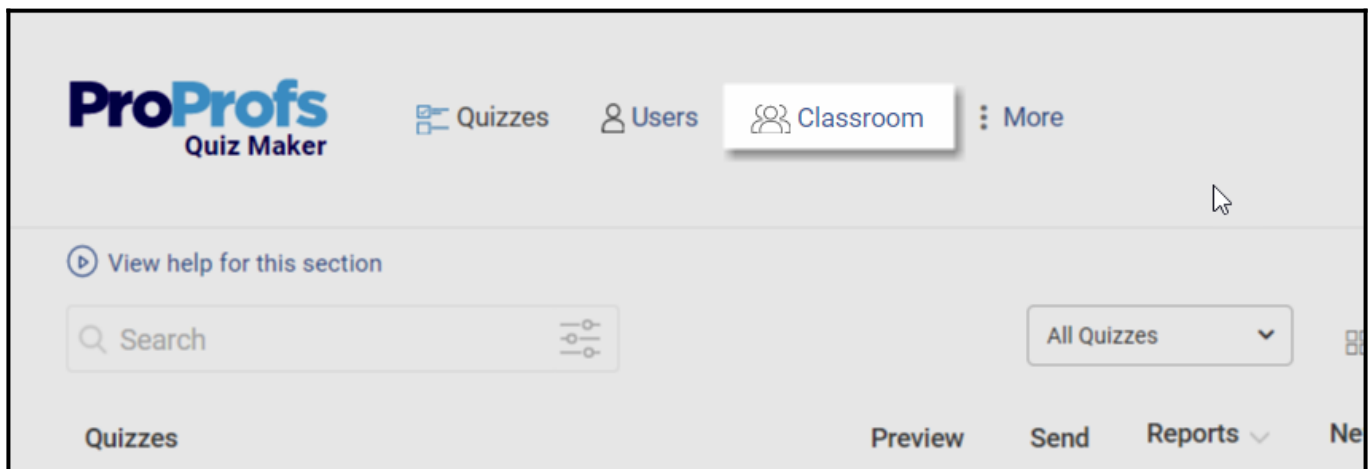

Before we proceed, here's what an embedded classroom will look like on a webpage. Learners can log in using the credentials to access the quizzes you assign to them.

**A few benefits of embedding a classroom on a website are:**

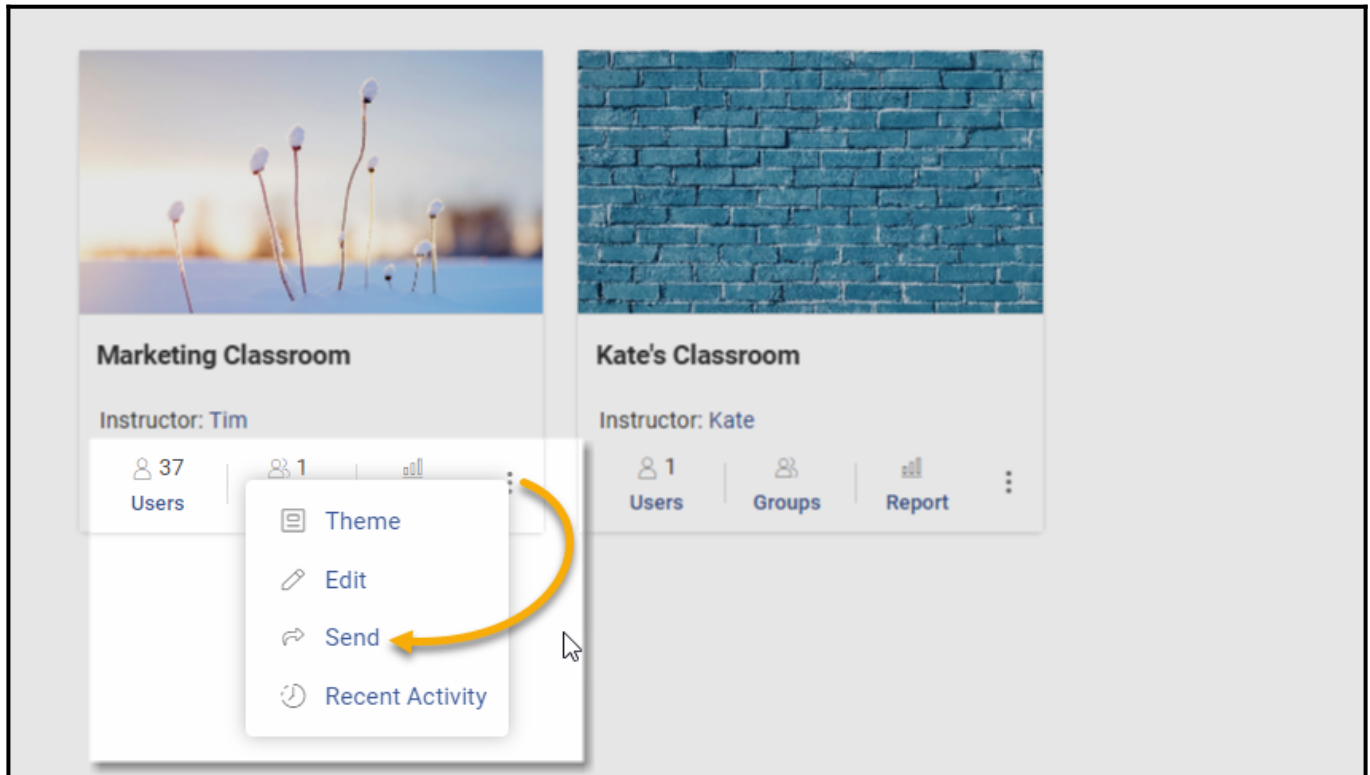

- Assign multiple quizzes to learners at once and generate comprehensive reports for quick and effortless performance analysis
- Make your website more attractive and professional
- Enhance user engagement
- Boost lead generation, conversions, and sales

## To embed a classroom on a website:

**Step 1:** Go to "Classroom" on your quiz maker dashboard.

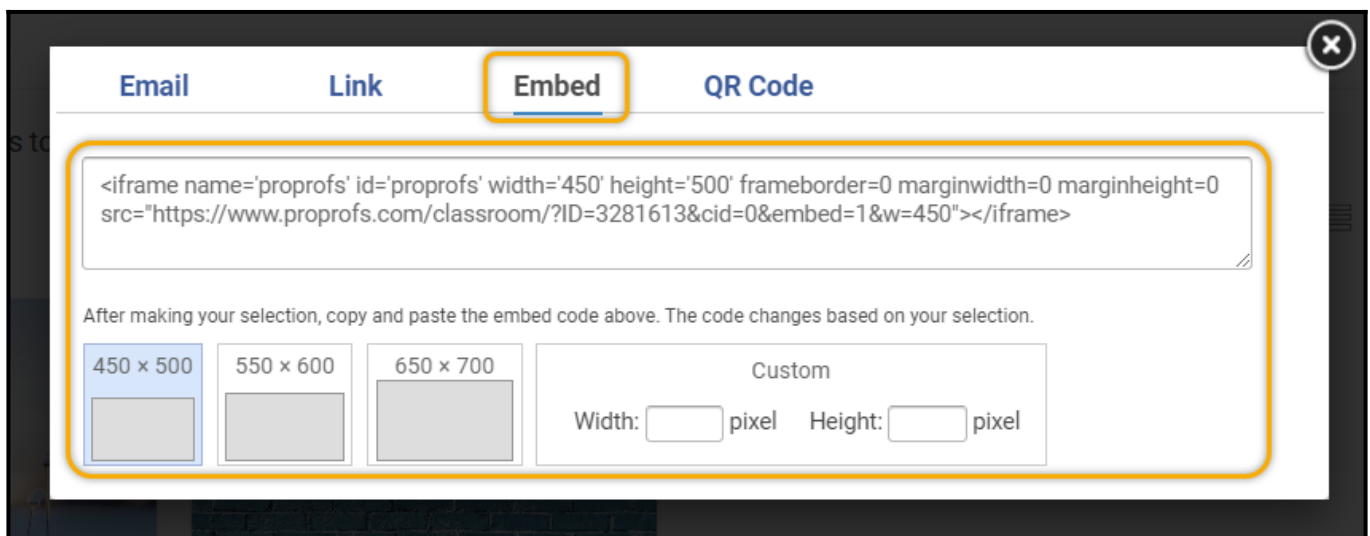

**Step 2:** Click the three vertical dots or the kebab menu icon and select "Send" from the list.

**Step 3:** In the Share dialog, switch to the “Embed” option. Select an available dimension or enter a custom width and height in pixels. Once done, copy the code.

**Note:** The embed code changes based on your selection.

**Step 4:** Go to the webpage where you want to embed the code, paste it in the <body> tag, and preview the site. You will see the classroom login screen, as shown below.

Marketing skills encompass a wide range of abilities that empower professionals to connect with target audiences, promote products and services effectively, and drive brand growth. These skills include market research and analysis, content creation, social media management, search engine optimization, digital advertising, storytelling, customer relationship management, and more. By honing these skills, marketers can craft compelling campaigns, develop meaningful relationships with customers, and achieve business objectives.
