

How to Enable Self-Registration of Users for Quiz Enrollment

ProProfs offers **instructors various options** for managing learner registration. One **effective method** is to **enable learners to self-register** in the classroom. This automates the registration process for quizzes, courses, or groups, saving instructors time and effort that would otherwise be spent manually updating learner information such as names, email addresses, and phone numbers.

Instructors can use secret join codes to facilitate easy self-registration of learners into the appropriate groups.

Here's what a user registration form will look like:

A screenshot of a 'User Registration' form. The form is titled 'User Registration' and has a close button (X) in the top right corner. It contains several input fields: 'First Name', 'Last Name', 'Email', 'Password', 'Confirm Password', 'Department' (a dropdown menu with 'Content' selected), 'Company', and 'Role'. At the bottom of the form is a large blue button labeled 'Register'.

Benefits of enabling self-registration for students to enroll in quizzes:

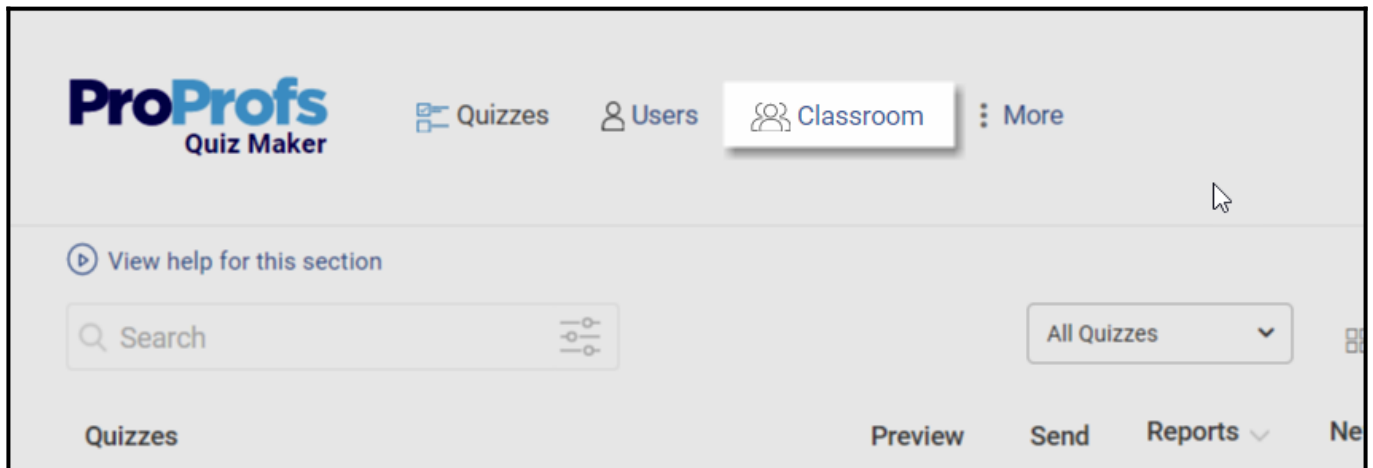

- **Time savings:** Allowing self-registration eliminates the need to update learner details manually, saving valuable time.
- **Selective data collection:** The feature enables displaying only the necessary information,

avoiding unnecessary data entry.

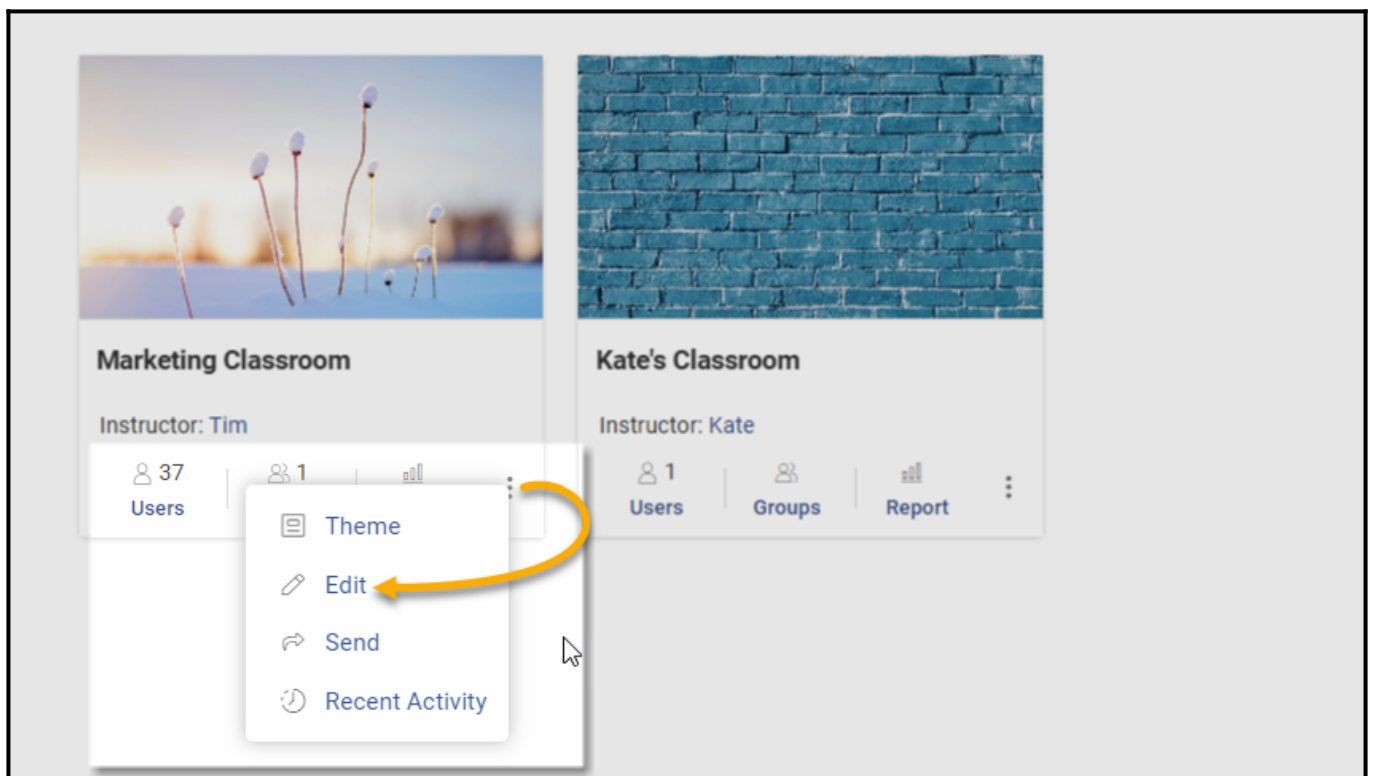

- **Streamlined registrations:** Automation makes the registration process hassle-free, ensuring a smooth and efficient experience.

To enable self-registration for learners, please follow these steps:

Step 1: Go to **Classroom** on the quiz maker dashboard.

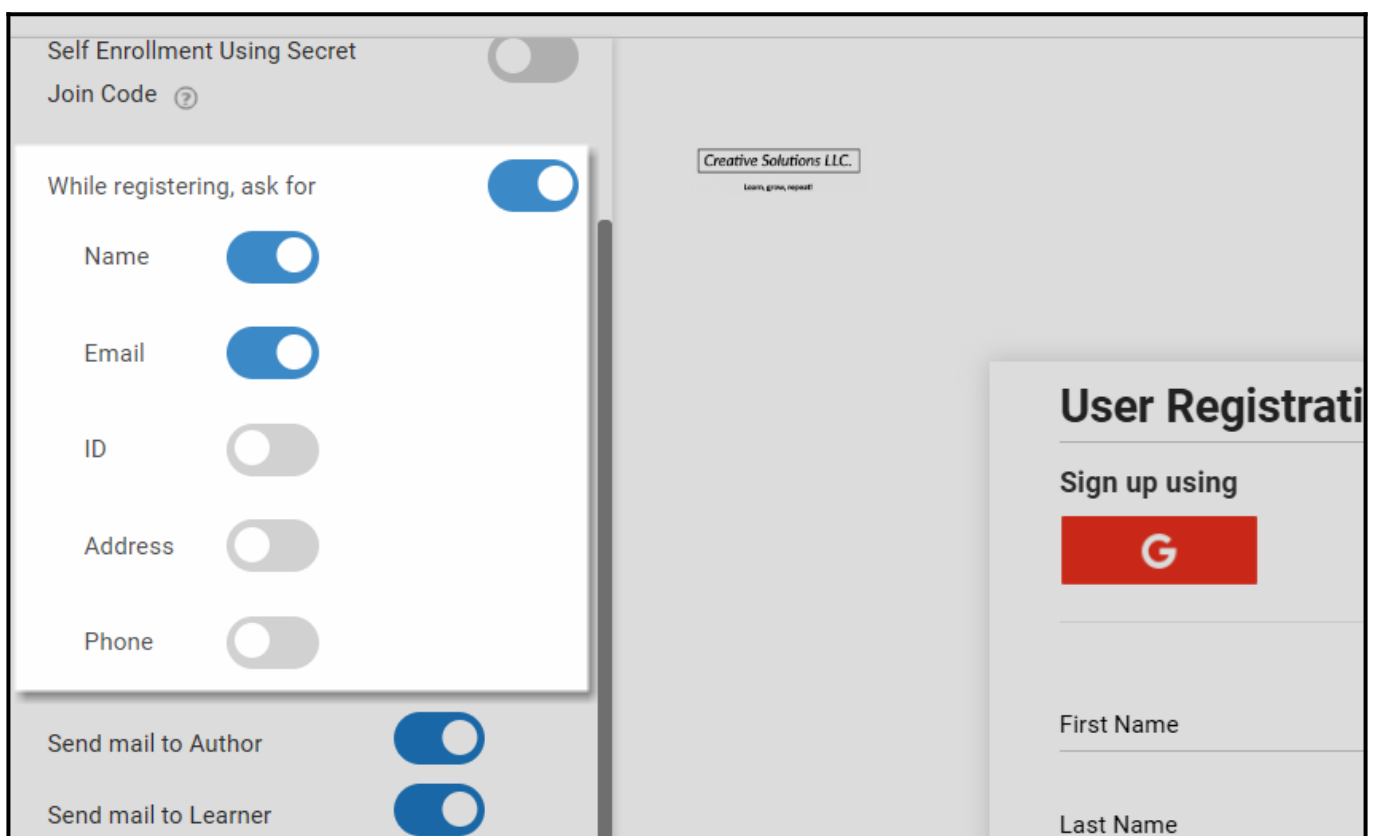

Step 2: Click the **three vertical dots** or the **kebab menu** icon to access additional settings and select **“Edit”** from the list.

Step 3: You will see a list of options. Click to expand **“Welcome Screen”** and select **“Registration Form.”**

Step 4: To ask learners for specific information during self-registration, enable the option “**While registering, ask for**” and select the fields you want them to provide.

Step 5: In addition to the default fields, you can add custom questions to the registration form. Go to **Settings** > Enable “**Create your own question**”> Select a **question type** to add and ask your question.

Step 2: Once new learners click on the “**Sign Up**” link, they will be taken to the “**User Registration**” page, where mustve to fill in their information. When your learners have filled in the required fields and set up their passwords, they can log in to your classroom.

A screenshot of a 'User Registration' form. The form is titled 'User Registration' and has a close button (X) in the top right corner. It contains several input fields: a first name field with 'Babe', a last name field with 'Ruth', an email field with 'babe.ruth12@thisnext.com', two password fields (both masked with dots), a 'Department:' dropdown menu currently showing 'Technology', a company name field with 'Creative Solutions LLC.', and a job title field with 'Senior Technical Lead'. At the bottom is a large blue 'Register' button. The form is set against a dark background with a light gray border.
