How to Manage Users in a Classroom

ProProfs Quiz Maker allows you to manage users in your quiz account. You can add users, assign quizzes, and even club users to a group.

When you exceed your user limit, you can delete users who are no longer available and add new users in their place to continue to assign and share quizzes with them.

However, deleting a user will erase all the information and reports related to them.

Managing users in ProProfs Classroom lets you:

- Mark users as active/inactive as per their activity
- Optimize classroom space by removing users who are no longer available
- Modify classroom login details for users for secure access

In this article, you'll learn:

- 1. Adding Users to a Classroom
- 2. Deleting a User
- 3. Setting an Expiration Date for a User Account

How to Add Users to a Classroom

Step 1: In your ProProfs Quiz Maker dashboard, go to "Users."

Step 2: Click "New User."

ec92506@moneyzon.com inev742@moneyzon.com vp40941@moneyzon.com		

NOTE: You can also bulk import user details from your Gmail or Microsoft accounts or

Excel sheet.

Step 4: Next, you can add the users to the groups. However, you can skip this step and continue without adding users to groups.
