

# What Are the Various Ways to Do the Registration of Learners?

With ProProfs, you can manage the registration of learners in the following ways:

1. **Add learners manually to a classroom:** Instructors can quickly add new learners to the classroom using their email addresses or IDs (usernames).
2. **Bulk upload an Excel sheet of learners:** Instructors can bulk upload details of users to the [classroom](#) and create hundreds of user accounts in a single step.
3. **Learners self-enroll to default groups:** Instructors can allow learners to self-register to a particular quiz, course, or group, saving time and effort.
4. **Learners self-enroll to a specific group using the join code:** Instructors can allow learners to self-register to default group(s) to save time and effort.
5. **Self-enrollment via Google sign-in:** Instructors can also allow learners to self-register in a classroom via Google sign-in. Users can use their own Gmail account to register for the classroom. Once authenticated, your end users will be part of the classroom.
