

# How to Enable Social Sharing for a Quiz

Allowing or disallowing social media links on your quiz result page is a quick and easy process.

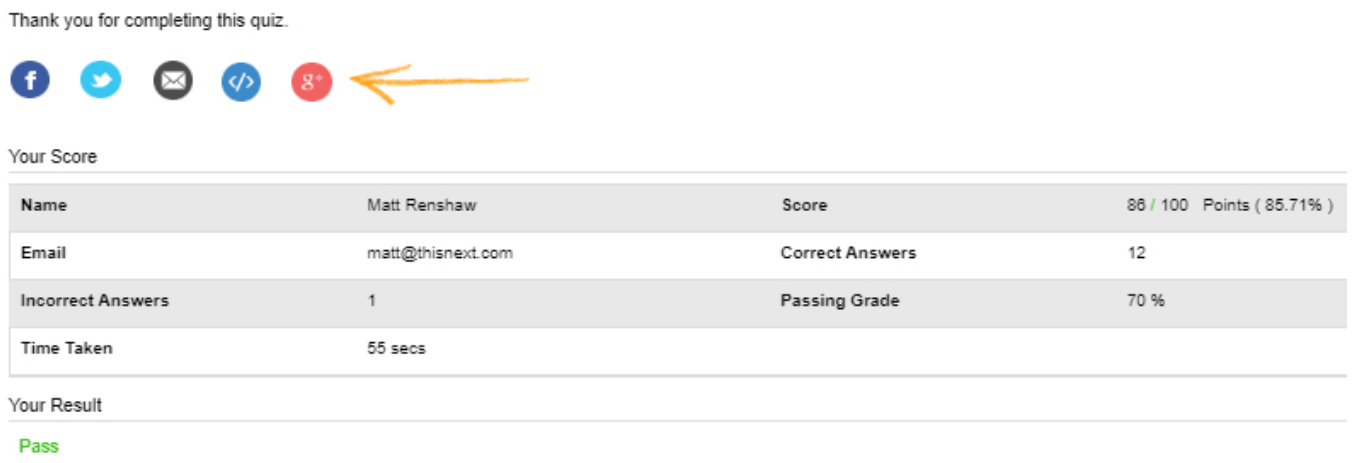

## How to allow social sharing for your quiz:

Navigate to "Settings" ----> "Social Media" and enable "Social Sharing." Save your settings to implement the changes.

You can add a message to be displayed while sharing the quiz, and also remove ProProfs.com to add your website's link along with the message.

Here's an example of how your quiz result page will look when you enable social sharing for the quiz:
