

How to Customize the Results in a Quiz Report

Customizing results gives you better control over displaying critical performance indicators to help learners assess their progress. From choosing a result type to revealing correct answers and adding a custom message, you can modify the results in a report in multiple ways.

Note: The instructor can see the full report (as well as the student version of the report) when they log in as the instructor.

Here's a screengrab that gives you a quiz report with customized results.

Your Score

Name	James Murphy	Score	60 / 60 Points (100%)
Correct Answers	8	Incorrect Answers	0
Email	james.murphy@xyzmail.com	Time Taken	55 secs

Result

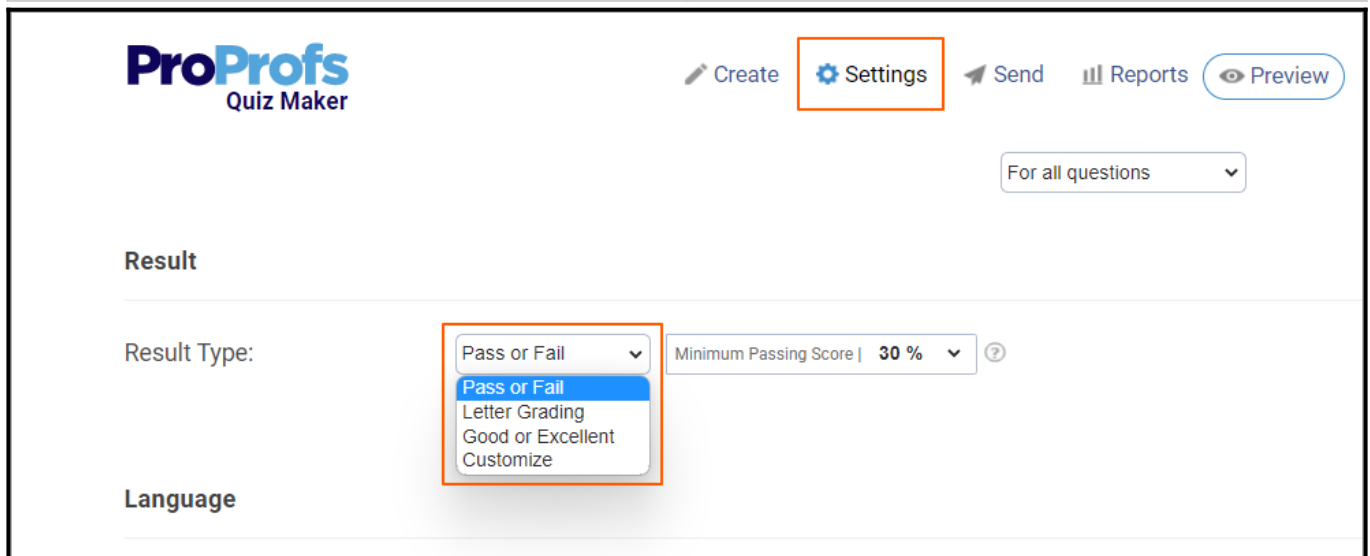

Distinction

You have secured the maximum grade for your performance in this quiz!

With customized results, quiz creators can provide detailed insights, enhance engagement, and better evaluate the effectiveness of their quizzes. Meanwhile, quiz takers can benefit from a clear understanding of their performance, personalized feedback, and increased motivation to improve.

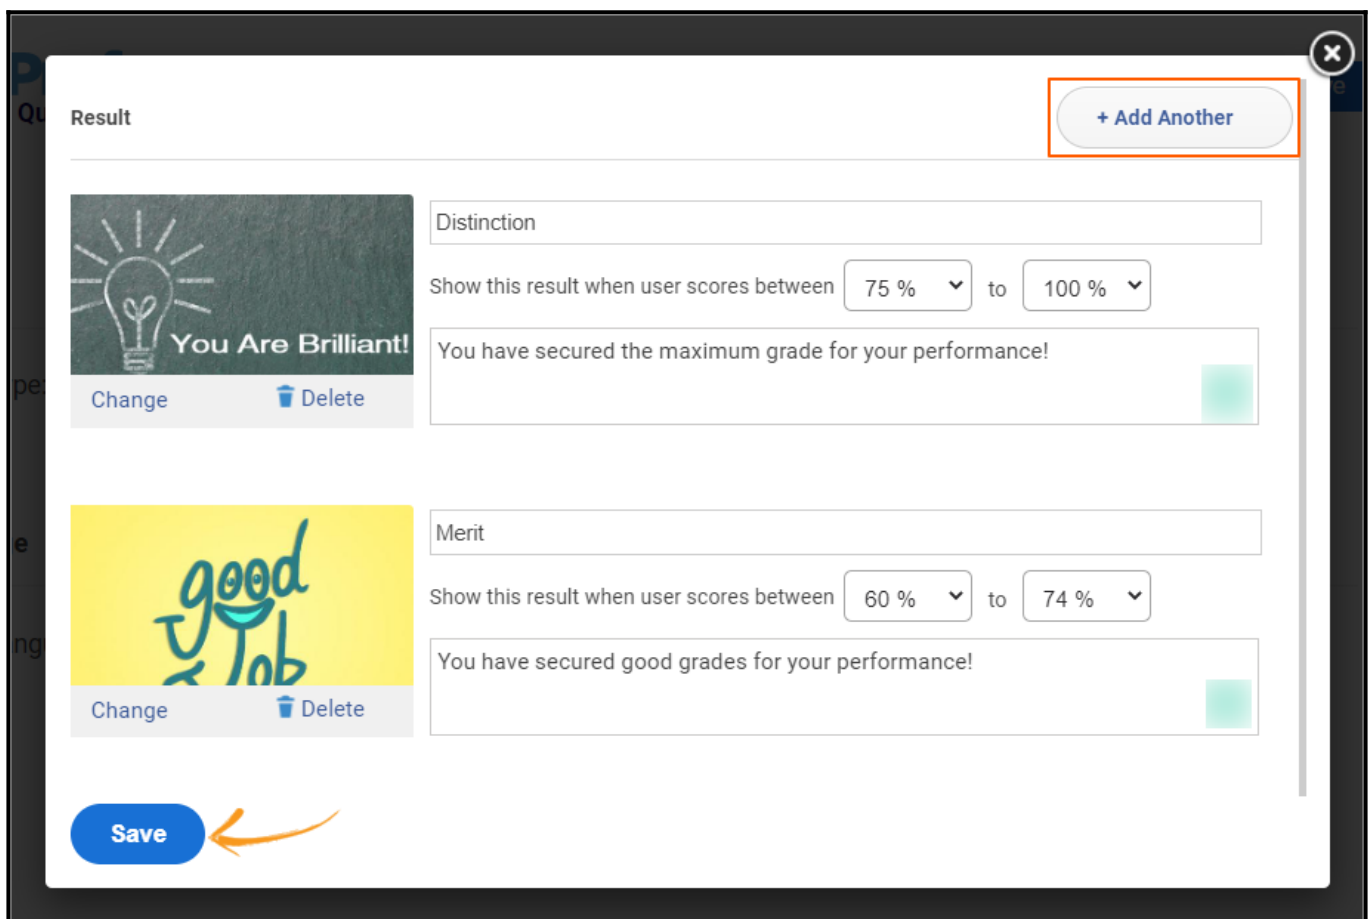

Here's how you can customize the type of result:

Step 1: Go to a quiz's **general settings** and scroll down to the bottom of the page to locate the **Result** section. Open the **Result Type** dropdown and **select** the appropriate **option**.

The screenshot shows the ProProfs Quiz Maker interface. At the top, there is a navigation bar with the ProProfs Quiz Maker logo, a 'Create' button, a 'Settings' button (highlighted with an orange box), a 'Send' button, a 'Reports' button, and a 'Preview' button. Below the navigation bar, there is a dropdown menu for 'For all questions'. The main content area is titled 'Result' and contains a 'Result Type:' dropdown menu (highlighted with an orange box) and a 'Minimum Passing Score' dropdown menu set to '30 %'. The 'Result Type' dropdown menu is open, showing options: 'Pass or Fail', 'Letter Grading', 'Good or Excellent', and 'Customize'. Below the 'Result Type' dropdown, there is a 'Language' section.

Step 2: An overlay opens when you choose the “**Customize**” option. Here you can **modify** the **grading** for different score ranges, **add** the result **title** and its **description**, and **upload** an **image**. **Save changes** once you’re done to create a custom result type.

The screenshot shows the 'Result' overlay in the ProProfs Quiz Maker. It features a '+ Add Another' button (highlighted with an orange box) in the top right corner. The overlay displays two custom result types: 'Distinction' and 'Merit'. Each result type has a corresponding image (a lightbulb for 'Distinction' and a 'good job' graphic for 'Merit'), a title, a description, and a score range. The 'Distinction' result is shown for scores between 75 % and 100 %, with the description 'You have secured the maximum grade for your performance!'. The 'Merit' result is shown for scores between 60 % and 74 %, with the description 'You have secured good grades for your performance!'. Each result type has 'Change' and 'Delete' buttons. At the bottom left, there is a 'Save' button (highlighted with an orange arrow).

Besides the result type, you can also customize the final quiz report in ProProfs Quiz Maker. Navigate to “**Settings**” > “**General**” > “**Quiz Report**” and select “**Yes**” for “**Customize report for quiz taker.**” Configure the available options and click “**Save**” in the top navigation panel to secure the changes.

Quiz Report:

Customize report for quiz taker	Example Report	<input checked="" type="button" value="Yes"/>	<input type="button" value="No"/>	?
Show certificate		<input checked="" type="button" value="Yes"/>	<input type="button" value="No"/>	?
Show custom message at the end of quiz		<input checked="" type="button" value="Yes"/>	<input type="button" value="No"/>	? Customize Message
Show score (Ex: 70 out of 100)		<input checked="" type="button" value="Yes"/>	<input type="button" value="No"/>	
Show result (Ex: You Passed!)		<input checked="" type="button" value="Yes"/>	<input type="button" value="No"/>	
Show "Try Again" button		<input type="button" value="Yes"/>	<input checked="" type="button" value="No"/>	?
Show report with each question graded as correct or incorrect		<input checked="" type="button" value="Yes"/>	<input type="button" value="No"/>	?
		<input type="text" value="Always"/> ▼		
Show correct answer in report		<input checked="" type="button" value="Yes"/>	<input type="button" value="No"/>	?
		<input type="text" value="For all questions"/> ▼		

That is all about customizing results and the final report of your quiz.
