

How to Make My Quizzes Secure and Private

Private quizzes are prevented from appearing publicly on the web as they do not list on search engines such as Google. Furthermore, private quizzes help in minimizing cheating by stopping unauthorized access.

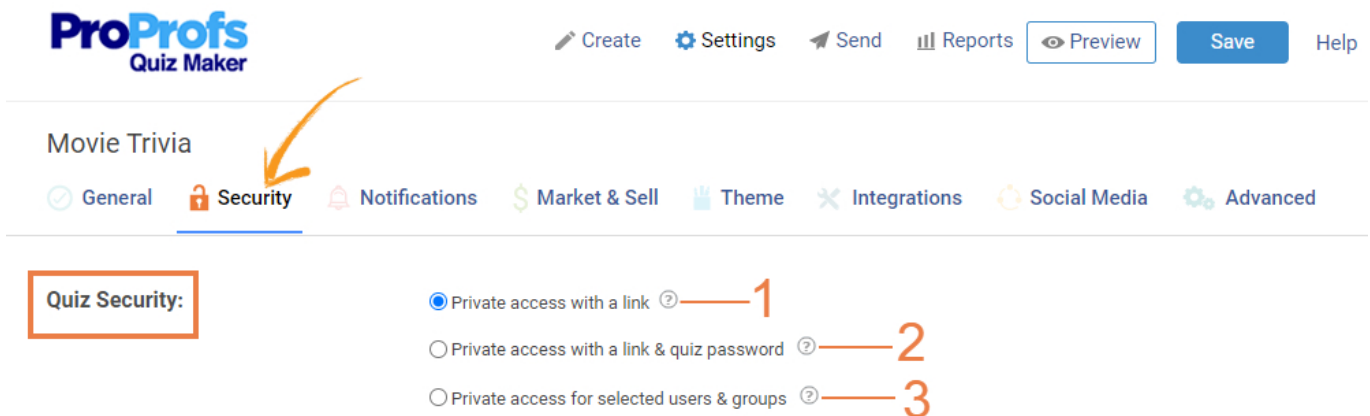

By default, each quiz you create with ProProfs is private. However, you can set the level of privacy according to your preference.

Here's how you can make your quizzes secure and private:

Step 1: Go to a quiz's **settings** from your ProProfs Quiz Maker dashboard.

Step 2: Go to the **Security** tab and find the **Quiz Security** settings. There are three ways, as explained below, in which you can set a quiz's privacy settings.

1. Share the quiz URL with those users that you want to take the quiz. Anyone without the link cannot access this particular quiz.
2. More secure than the first option, your users will need a password along with the URL to have access to the quiz. Enter the **password** in the box provided that you can share with your users along with the quiz link.

Quiz Security:

Private access with a link [?]

Private access with a link & quiz password [?]

Private access for selected users & groups [?]

3. Only those users and groups can access this quiz who have been added to it by you. To add users and groups, click **Manage users**.

Quiz Security:

Private access with a link [?]

Private access with a link & quiz password [?]

Private access for selected users & groups [?] **Manage Users**

Step 3: Do not forget to **save** when you've selected your preferred quiz security setting.
