

How to Assign Individual Username/Password to Quiz Takers

With [ProProfs Quiz Maker](#), you can [create secure and private quizzes](#) by setting up login ids and passwords for your learners via the [classroom](#). These quizzes will be accessible to only your select learners with whom you've shared the usernames and passwords.

Learners will need to login to the classroom, with the username and password you've created, to access the quizzes.

Here's how you can create or change usernames and passwords of your users:

Navigate to "Settings" -----> "Security," and select "Private" for 'Quiz Security,' then select "Private access for selected users & groups." Click "Manage Users" to set up the usernames and passwords for users & groups.

Comprehension Test

- General
- Security**
- Notifications
- Price
- Theme
- Social Media
- Advanced

Quiz Security:

- Public
 - Private**
 - Private access with a link [?]
 - Private access with a link & quiz password [?]
 - Private access for selected users & groups [?] [Manage Users](#)
-

You will be redirected to your classroom, where you can [add new learners](#) and create

usernames and passwords for them, or you can change the usernames and passwords for the existing users.

To change the username or password of a user, select the user from the list and click the 'Edit' button to edit the user profile.
