

# How to Make a Quiz Available Within a Certain IP Address Range

With ProProfs, there are a number of security measures to protect your quizzes. Using these security measures you can control who can access your quizzes and also [prevent cheating in online tests](#).

One of the effective ways to keep your quiz secure is by setting IP range based security. This helps you to ensure that only those learners can access your quiz who are connected to the Internet under certain IP ranges.

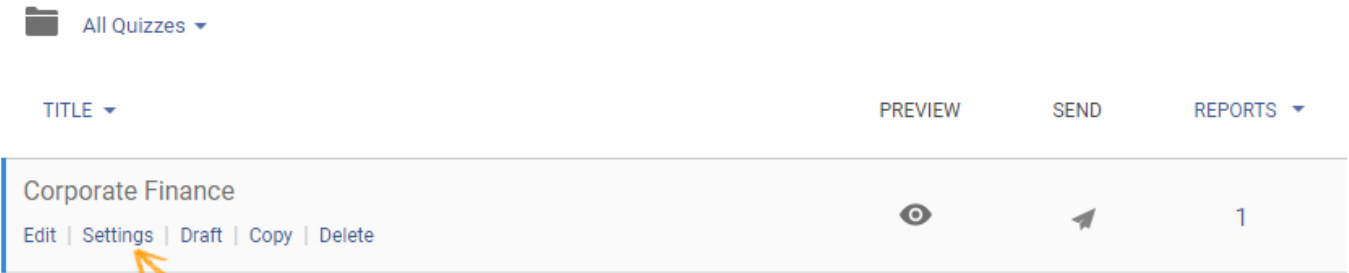

**Note\*** You can set one or multiple IP ranges for a quiz.

The image below shows you the message that will be displayed when learners try to access your quiz from an IP address other than the one you have set for it.

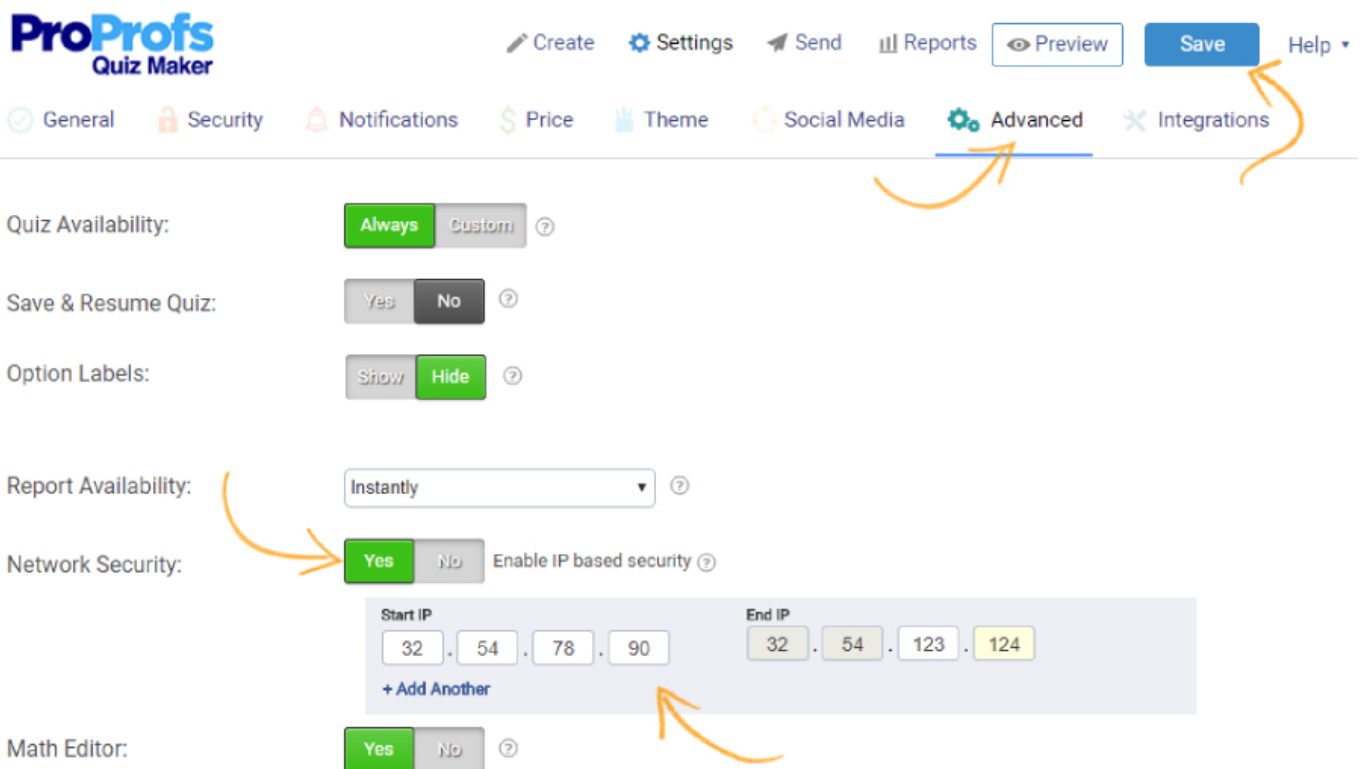

Learn how you can enable IP based security for your quizzes by following the steps below:

**Step 1.** Click "Settings" for the quiz you want to set IP ranges.

**Step 2.** Navigate to "Advanced" tab, locate "Network Security" and turn the toggle button to "Yes." Add the IP ranges in the fields provided, click "Save" at the top right to implement the changes.
