

How to Check System Availability & Response Time in Quiz Maker

You can view all the details of our system performance and availability on our [Trust ProProfs page](#). On this page you can view the following details:

- View uptime report, we strive for near 100%
- View our fast response time
- View response time by country

You get to see not only the live response time of our systems but also historic information of our system availability stats.

Our [quiz software](#) is available 24/7 and learners can take the quizzes from anywhere at anytime. We understand that robustness and speed are the two main concern areas as learners taking [online tests](#) require a high response time. To ensure that our software maintains a constant and high response time, we regularly undergo system maintenance and we practice complete transparency when it comes to communicating maintenance.

Important features of our system & data security

- Daily local & remote backup included in all plans
- State-of-the-art computer servers, with dedicated generators & battery backup
- Servers hosted at a secure location, with multiple power feeds & fiber links
- Regular security updates for software and infrastructure
- Network protected by an enterprise-class firewall

What you can do with your data

- Download, print or delete your data at anytime
- Download your data to CSV or as Excel spreadsheets
- Use our API to export data into your company's database
