

Is ProProfs Quiz Maker SCORM Compliant?

Yes, ProProfs Quiz Maker is [SCORM](#) (SCORM 1.2, SCORM 2004) compliant.

[ProProfs Quiz Maker](#) allows creating SCORM compliant [quizzes](#), [tests](#), [online assessments](#), etc. ProProfs Quiz Maker also integrates with [ProProfs Training Maker](#) (a full-blown cloud LMS tool with the ability to create & deliver [courses](#) and additional learning content). Your quizzes will work on the desktop web browser and mobile devices both.

It will let you access detailed quiz reports (such as who took your quiz, what their score was, what content they viewed in your quiz etc.) and view learners' interactions without logging into the ProProfs LMS. You can do that from within your [SCORM LRS](#).

This doesn't mean we skimped on any features - all the things you expect are here, such as randomized questions, shuffled order, and much more.
