How to Embed a Quiz on Google Sites

ProProfs Quiz Maker lets you share quizzes on your Google websites using the embed code. Embedding a quiz on a Google Sites website is quite easy. Simply copy and paste the embed code into your Google Sites page editor.

By embedding ProProfs quizzes on your Google websites, you can:

- Grow more leads from your website

- Engage your customers and increase site retention time

- Capture detailed customer insights using online quizzes.

How to Embed a Quiz on Google Sites

**Step 1:** In your ProProfs Quiz Maker dashboard, navigate to the quiz to be shared and click the share icon.

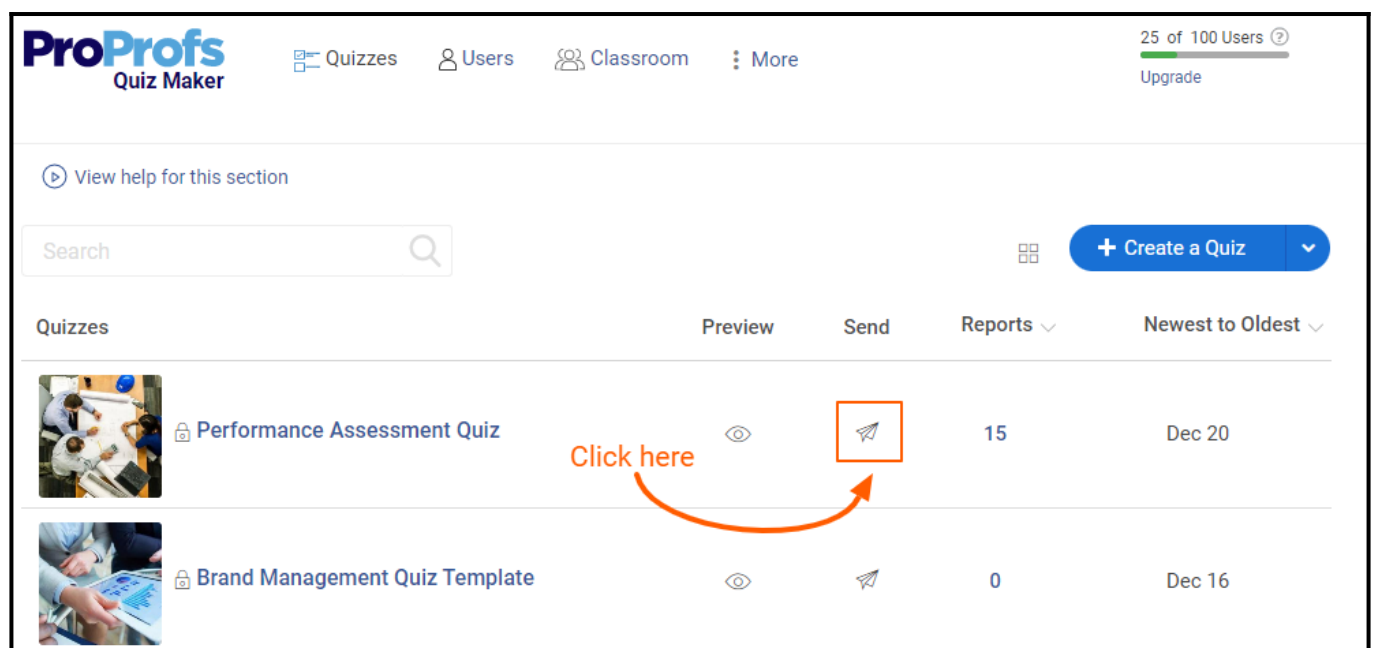

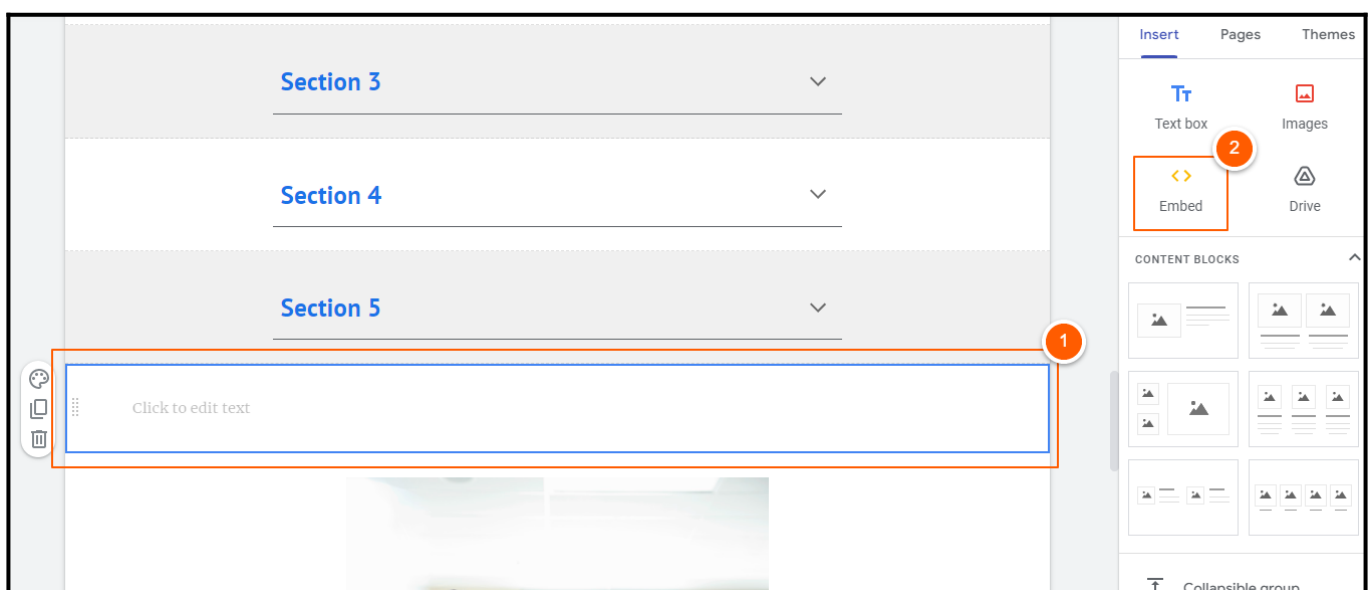

Step 2: In the popup window, navigate to Embed

- Select "**Website**."

- Choose a window size from the available size, or you can set a custom size.

- Copy the embed code.

Step 3: Log in to Google Sites and create a new site from scratch (select blank) or choose from an existing template.

Step 4: Navigate to the block editor and click Embed to open the embed form.

Step 5: Select the embed method using Embed code, paste the code, and click Next.

Here's a preview of your quiz embedded on a Google website. Click Insert to proceed.

Step 6: Click **Publish**.
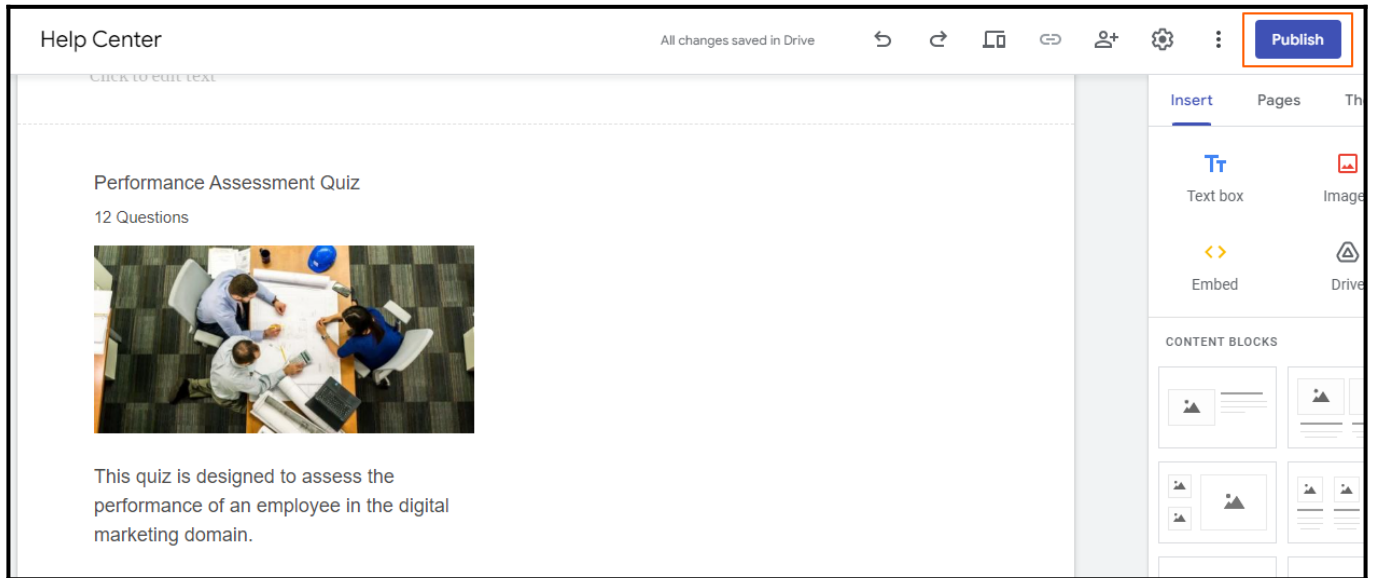

That is all about embedding a quiz on a Google Sites website.
