# How to Ensure Quizzes Created With ProProfs Work on Safari

Superior HTML5 technology powers quizzes created at ProProfs. This technology ensures that your quizzes on ProProfs load faster and run on all kinds of mobile devices such as iPhone, iPad, Android. Also on browsers including Internet Explorer, Firefox, Safari, Google Chrome and more.

However, at times Safari's default cookie settings block third-party apps. As a result, learners trying to access quizzes embedded on your website or blog using Safari might not be able to do so. In case you are accessing your quiz directly at ProProfs.com, the same will work fine across all platforms and mobile devices.
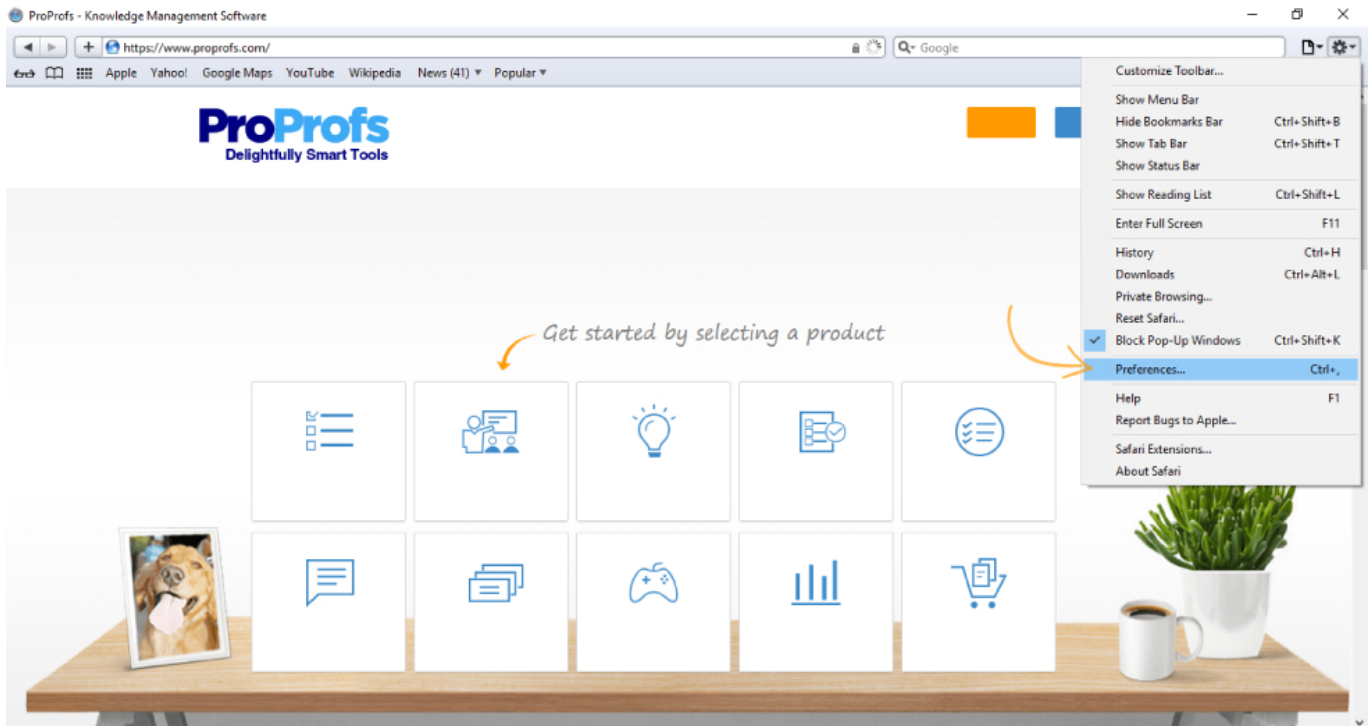

> **\*Note:** This article describes a rare scenario that usually does not happen unless the settings in the browser are non-default.

**How to fix Safari issues on a laptop, iPhone, and iPad?**

**1.** Safari on Windows
**2.** Safari on Mac
**3.** Safari on iPad
**4.** Safari on iPhone

## Safari on Windows

**Step 1.** Open Safari and go to the quiz that is not working. Go to Safari settings and click on **Preferences**.
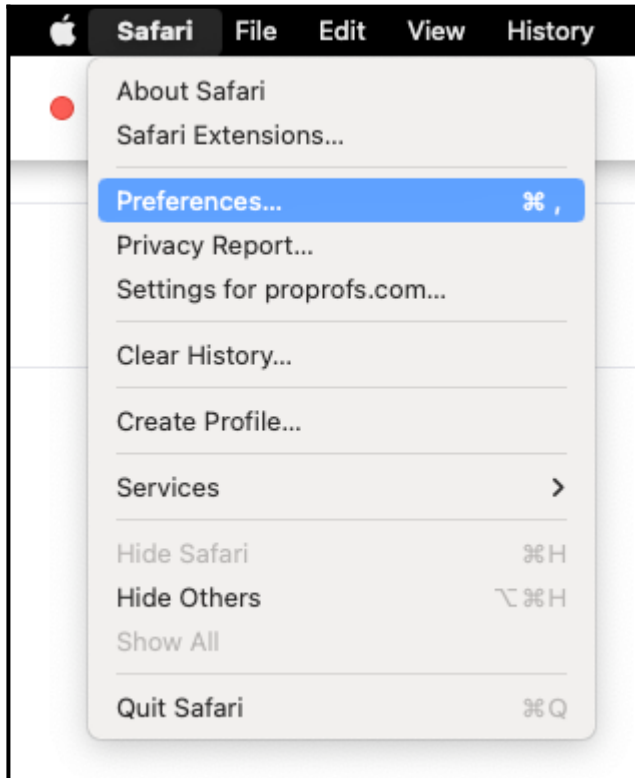

**Step 2.** Under **Privacy** tag >> **Block cookies**, you can see three options: "From third party and advertisers," "Always" and "Never." Make sure Block cookies is set to "**Never**."

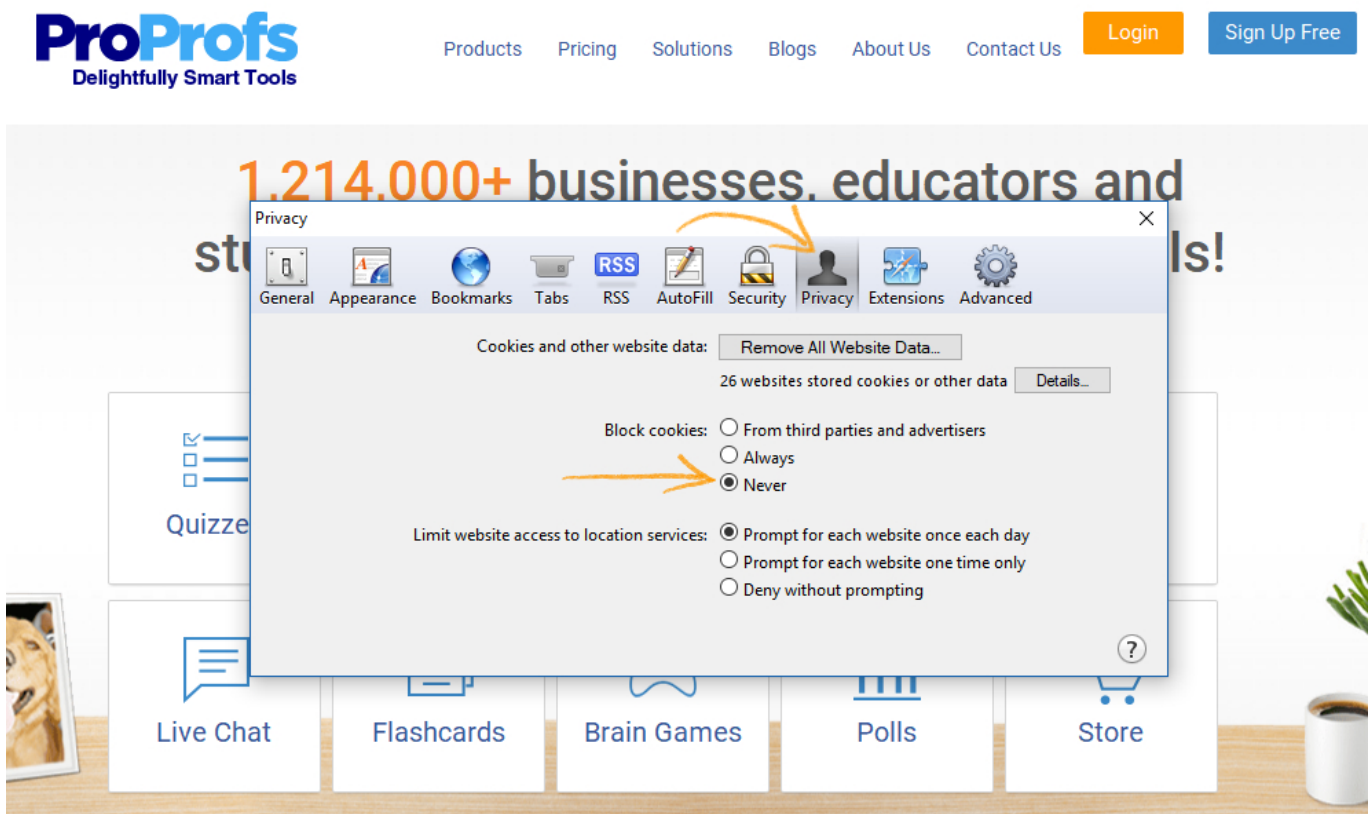

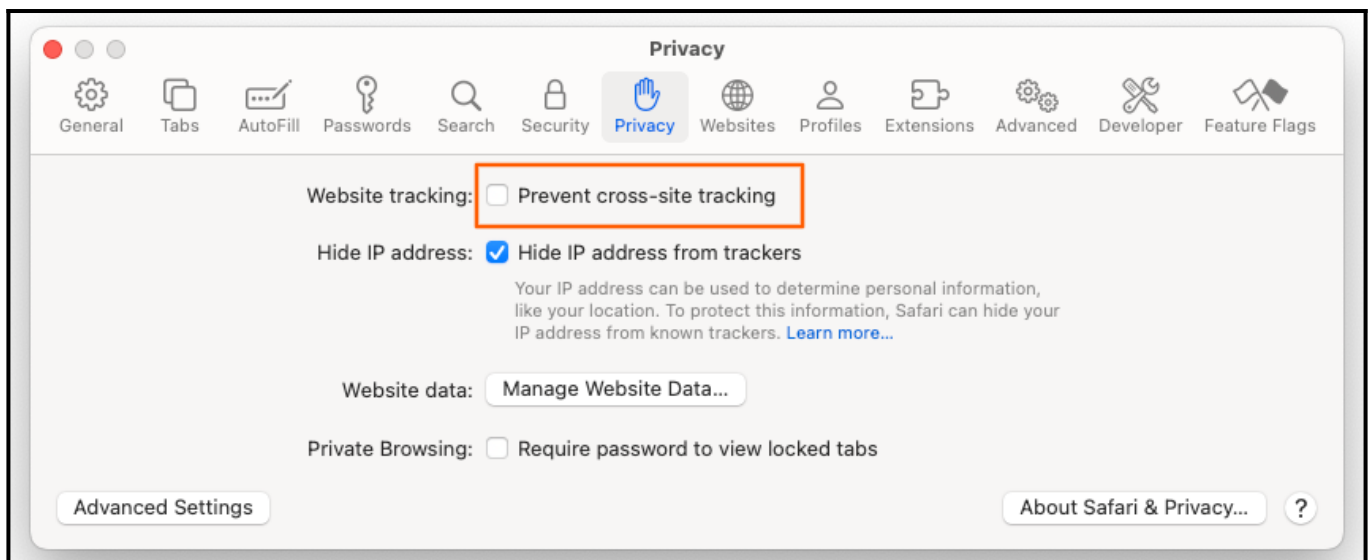

## Safari on Mac

**Step 1:** Open Safari and go to the quiz that is not working. Click **Safari > Preferences**.
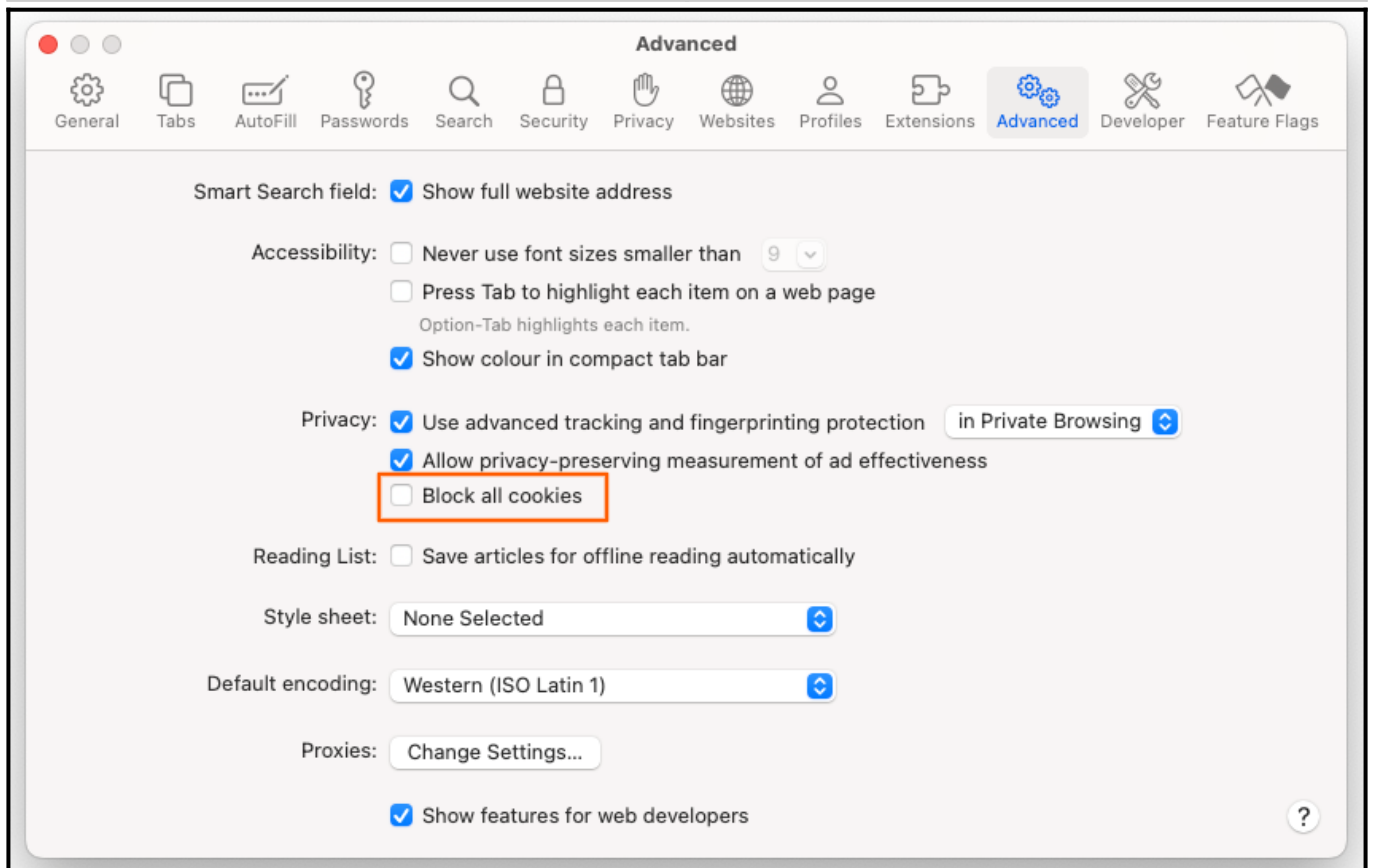

**Step 2:** Go to the **Privacy** tab. Untick the checkbox for **"Prevent cross-site tracking"**.

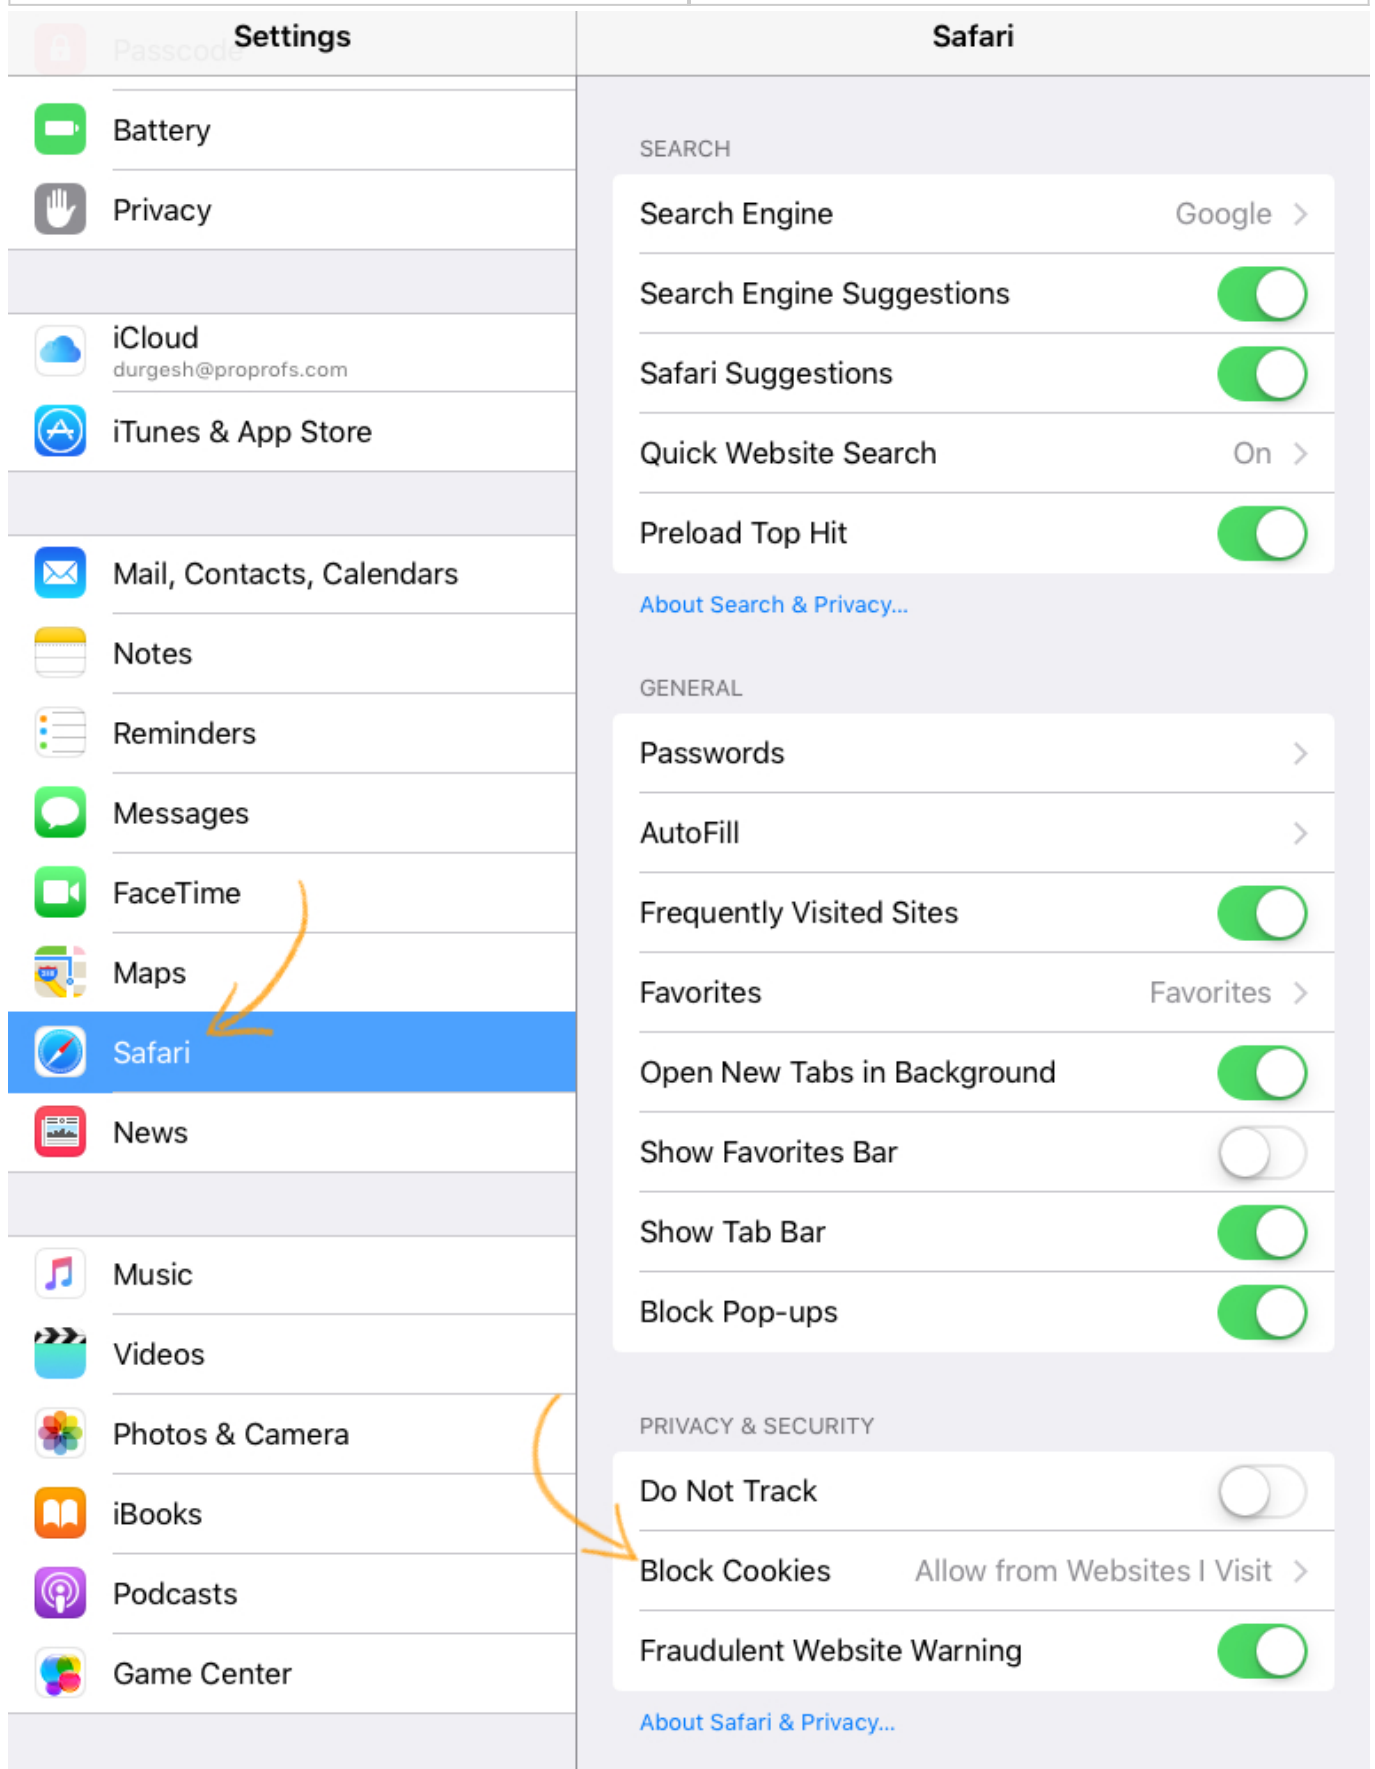

**Step 3:** Click on **Advanced Settings** (located in the bottom-left corner of the Privacy tab) or go to the **Advanced tab** directly.

- Ensure the option **"Block all cookies"** is disabled.

## Safari on iPad

**Step 1.** Open iPad settings and select **Safari**.
